Welcome

Prezi Desktop

Prezi
desktop_{v3.1.0}

© 2009-2010 Prezi Inc. All rights reserved.

With Prezi Desktop you can create, edit or show your presentations without an internet connection. You can open .pez files that you downloaded from <http://prezi.com> or saved by the Prezi Desktop itself. Store and share .pez files easily as you would do with any other regular file. It is also possible to upload your prezi into the online editor with just a single click.

This manual

This document will guide you through the basic features of Prezi Desktop.

Download and Install

Requirements

Operating System

Prezi Desktop will run on any Adobe Air capable system. We support the following ones:
Microsoft Windows XP or later
Mac OSX 10.5 or later

Adobe Air

Prezi Desktop needs Adobe Air environment which it will install automatically if you do not have it yet. In this case administrator privileges will be required.

Prezi.com user account

You will need a prezi.com account in order to use the Prezi Desktop. You can create one at <http://prezi.com/profile/signup/>

Download and Install

Go to <http://prezi.com/desktop/>

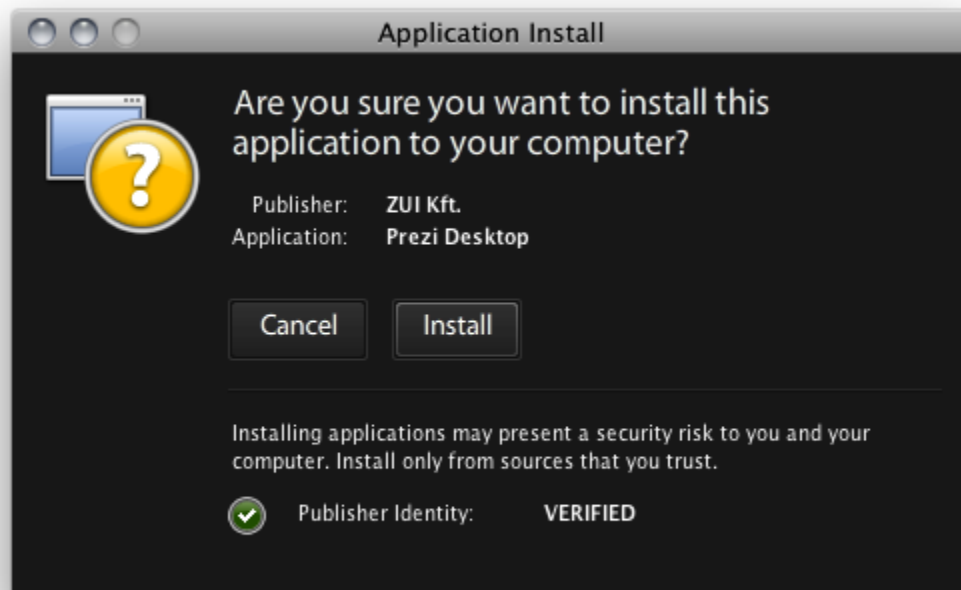

Click on Install Now

The installer will first install the Adobe Air environment (<http://www.adobe.com/products/air/>) if you do not yet have it. You must have administrator privileges in order to install Adobe Air. Click on Yes to accept the installation. Otherwise click Open.

Choose Install

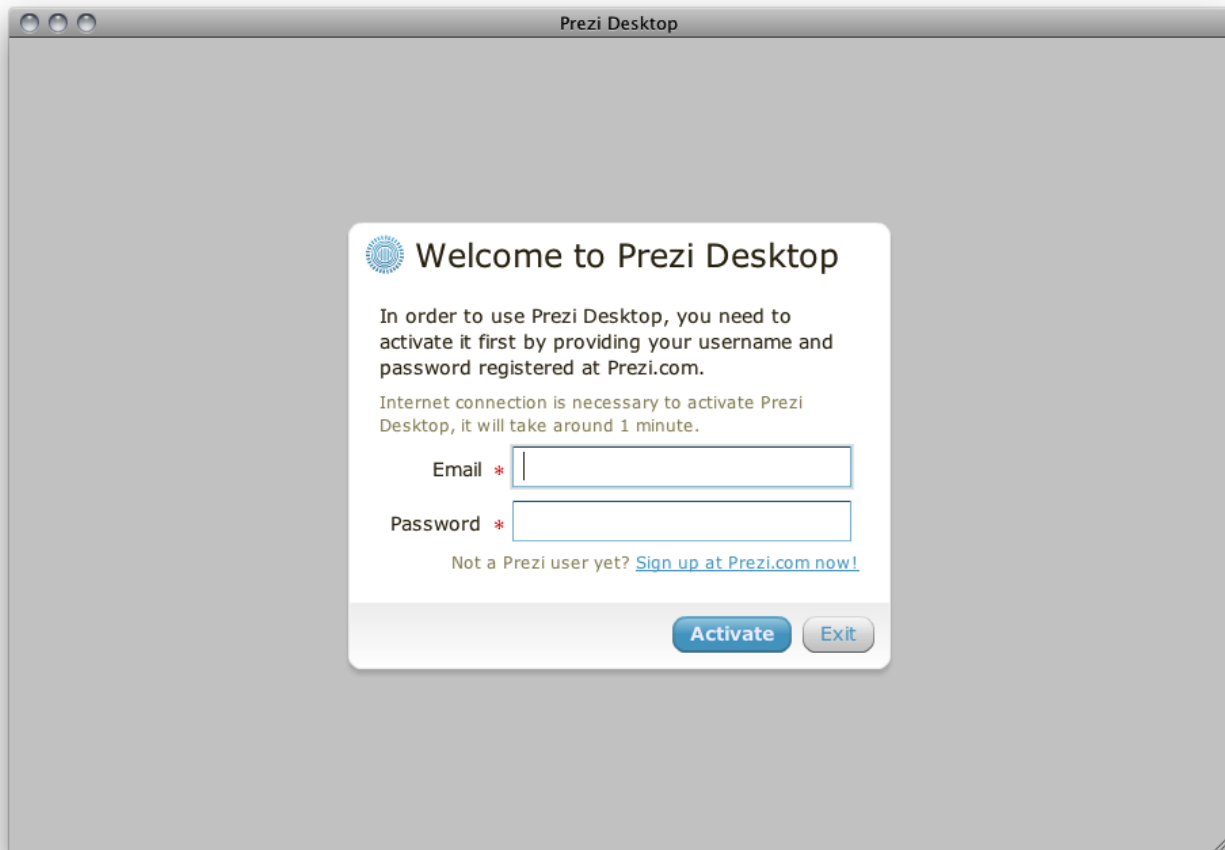

If you have an older version of Prezi Desktop installed you will be prompted to "Replace" it instead of "Install".

Click Continue

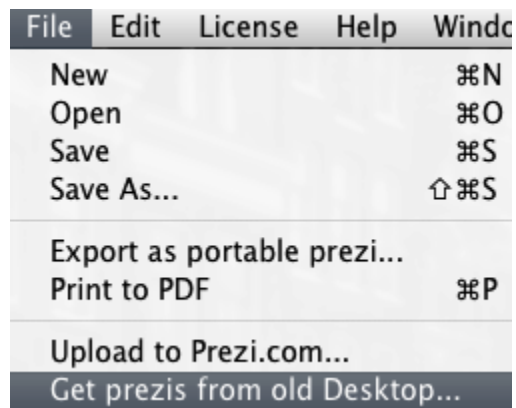

On this screen you can select where to install Prezi Desktop. We recommend leaving it as the default location for your operating system. If Adobe Air is not yet installed on your computer, you must click on "I Agree" after reading the terms of agreement for Adobe Air.

Activation

At the first start of Prezi Desktop you need to log in with your online prezi.com account so that we can activate your copy. Please make sure that your internet connection is working for this to take place. If you do not yet have an account click on the Sign up link and create one. On a slow internet connection, activation may take a long time, so please be patient as it is only needed once.

Get prezis from old desktop

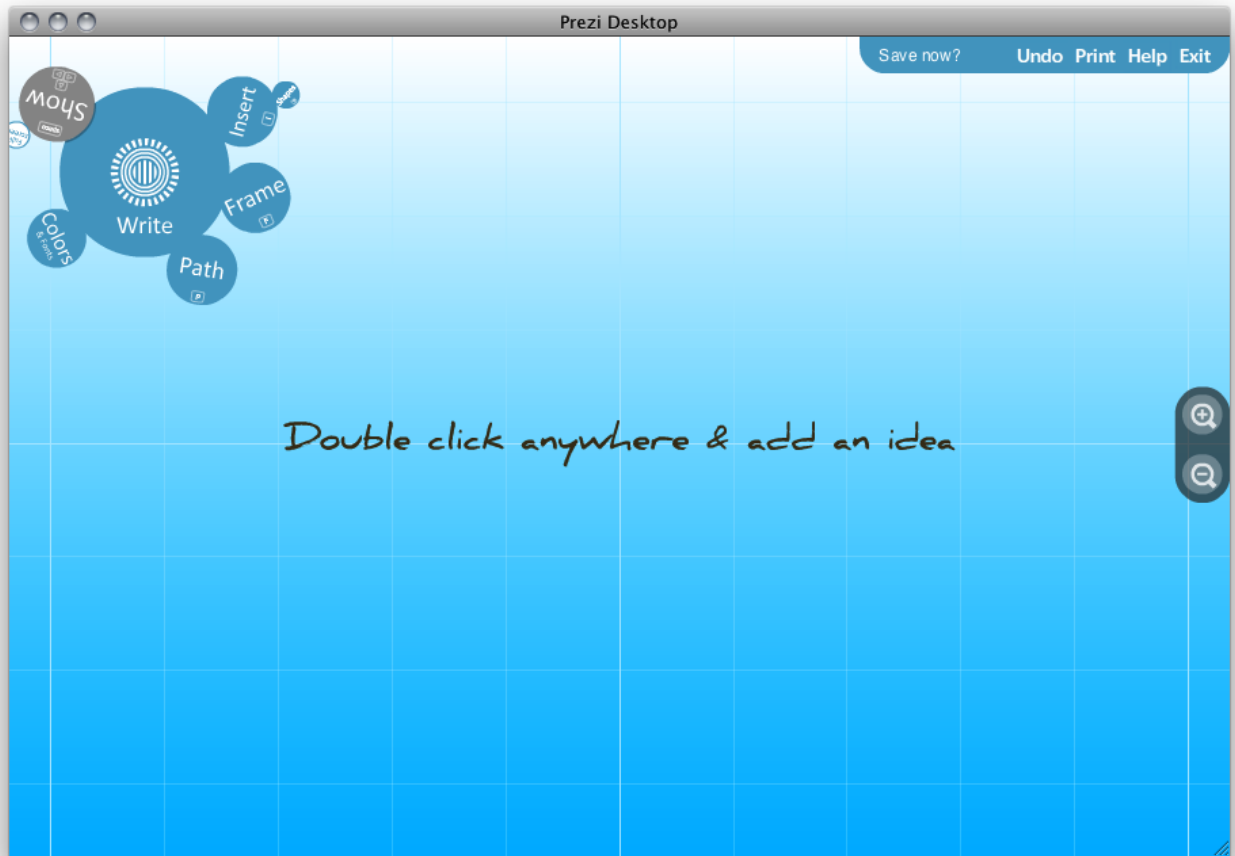

If you have prezis made in the version 2 or older of Prezi Desktop (versions before .pez file was implemented), choose "Get prezis from old Desktop..." from the File menu. It will automatically convert your prezis into .pez files and store them in a directory of your choice.

Get around in Prezi Desktop

Overview

Prezi editor

After starting the Prezi Desktop, you will see the Prezi Editor with a new empty prezi.

Opening, saving, creating a prezi

Working with .pez files

Name Talk.pez
Kind PreziDocument
Size 8 KB on disk
Created Today 1:40 PM
Modified Today 1:40 PM
Last opened Today 1:40 PM

The default file extension for prezis is .pez. Just use it as any regular file; copy, paste and rename it, send it by email, or double-click on the .pez to open it in Prezi Desktop.

New, Open, Save, Save as

File	Edit	License	Help	Window
New				⌘N
Open				⌘O
Save				⌘S
Save As...				⇧⌘S

Some common menu options are found in the File Menu in the top left corner, such as: Create a new prezi, Open an existing one, or Save the current prezi (Save As if you want to save it to a new file).

Save before quit

? Save changes?

Save changes to your prezi before closing it?

Don't save

Save

Cancel

When closing a prezi, choose whether to Save your current prezi, Don't Save and loose changes, or Cancel and return to the Editor.

Printing

Select Print from the File Menu

Choosing "Print to PDF" from the File menu will convert your prezi into a single pdf file based on the positions in your path. No actual printer is involved, but you can then open the resulting .pdf in your favorite viewer and print.

Wait for print

When you begin printing, Prezi Printer will navigate through your prezi and save the content exactly as it is found. This means that if you edit the prezi before the printing is finished, you may experience odd results in the resulting .pdf. For this reason, please wait until the pdf creation finishes before making any more changes.

Ready to save the pdf

Once the "Click to Save PDF" button appears, click on it to open a File Browser, choose a location and name, and save your newly created pdf. It is important that you leave the ".pdf" extension on the filename so that your operating system can properly detect the file type.

Downloading a prezi from the online editor

Select one of your prezis on <http://prezi.com/>

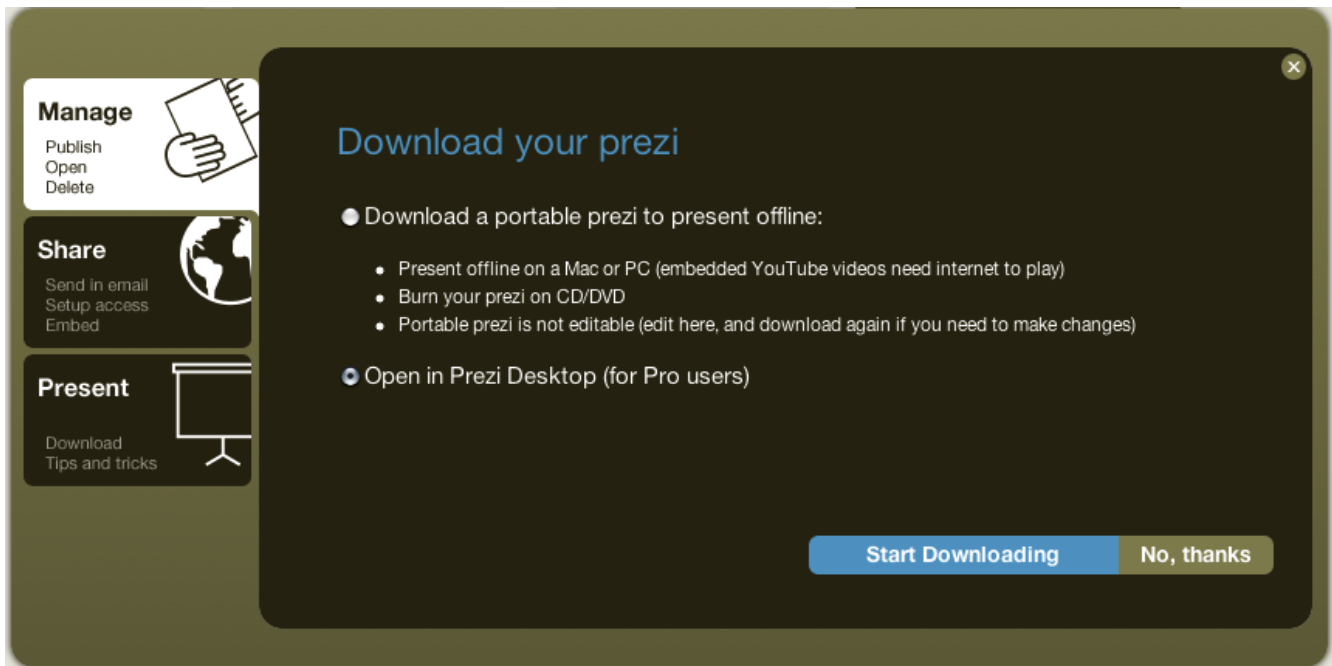

Click on a prezi from your main page after logging in to <http://prezi.com/>.

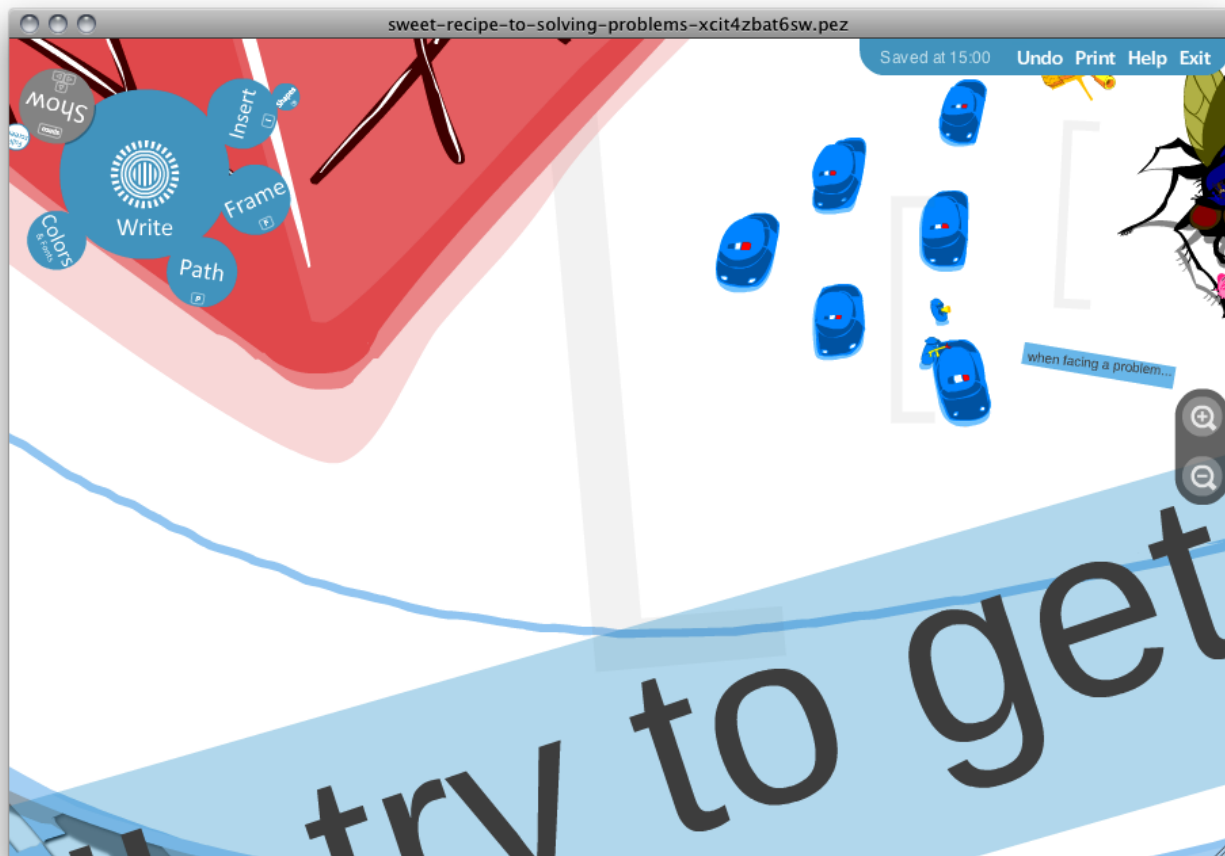

Click on the large brown Download button

A screenshot of the Prezi online editor interface. On the left, there are three main sections: "Manage" (Publish, Open, Delete), "Share" (Send in email, Setup access, Embed), and "Present" (Download, Tips and tricks). The main area shows a preview of the "Sweet recipe to solving problems" Prezi. Below the preview are three buttons: "Open" (blue), "Download..." (brown), and "Save a copy..." (orange). On the right, there is a metadata section with the title "Sweet recipe to solving problems", the name "Preztoon!", and the creator "Adam Somlai-Fischer" with a "Last saved" timestamp. There are also two checkboxes: "Make public?" (checked) with a "Copy link" button, and "Allow reuse?" (checked) with a description: "People can save a copy of this prezi. Your original prezi will stay intact."

Select Open in Prezi Desktop and click the blue Start Downloading button

Open the downloaded .pez in Prezi Desktop

Uploading a prezi into the online editor

Open the prezi you want to upload

Select Upload to Prezi.com form File menu

Give it a Title and Description

 **Upload to Prezi.com**

You will upload to Prezi.com as [akos.tothmate@prezi.com](#) [Change user?](#)

Title *

Descript... *

These fields are mandatory. You can change the account the file will be uploaded into by clicking on the "Change user?" caption.

Click on start upload and wait for the upload process.

 Upload successful.

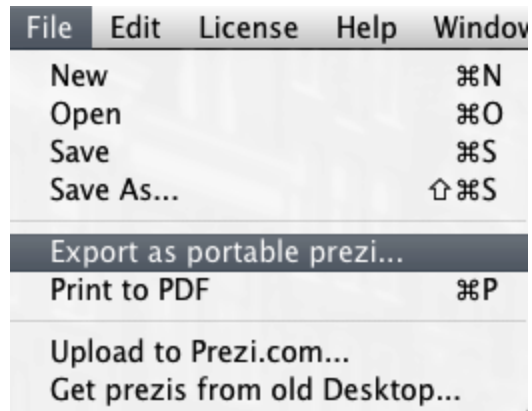

100%

OK

Upload automatically saves your prezi too. Upload speed can be influenced by your network connection. Please be patient. Once ready you will find your prezi on <http://prezi.com>.

Exporting a prezis

Export as portable prezis

License and user informations

Click on the License menu

Check your info

Your license details:

Email: **akos.tothmate@prezi.com**

License type: **PRO**

Expires: **Mon Dec 6 2010**

[Go, create some nice prezis](#)

Upgrade your license

This is a 30 day trial of Prezi Desktop. Your trial will expire on Tue Apr 27 2010.

29 days remaining

[Upgrade to Pro now...](#)

[Continue with trial](#)

You have to be a Pro user in order to use Prezi Desktop after 30 days. Click on Upgrade to EDU Pro/Pro menu item to upgrade your license. After upgrading, you have to restart Prezi Desktop.

Change Prezi Desktop user

You can change the user account associated with Prezi Desktop by providing a username and password registered at Prezi.com.

Internet connection is necessary to activate Prezi Desktop, it will take around 1 minute.

Email *

Password *

By selecting Change user in the License menu you can switch to a different user. After filling in the email and password fields click on the Reactivate button.

Update

Prezi Desktop automatically checks for updates on start

Once the update finishes downloading, choose Install now

It will restart Prezi Desktop with the update applied.

Check Known Issues

Manual: Knowledge Base

Known Issues

by Peter P Vajda

- It is currently not possible to **load a PDF in Prezi Desktop**, the offline editor.
- If your prezi is jerky when presenting, it may be that is too small in the mathematical space available for objects. Zoom out, select everything, and scale them all up.

It can be found on <http://prezi.com/learn/known-issues/>

Continue

Go to <http://community.prezi.com/prezi> and report your problem. The more details you give about your error the more chance to get a solution. Please include the following:
What version of operating system and Prezi Desktop do you use?

What steps did you do before the problem occurred?

What did you expect and what happened actually?

If you have a screenshot of the problem or the url of your prezi or if it is possible the .pez file.
